Dear Mr. Bechely:

I am writing in response to your letter of April 6, 1983 regarding the inspection at Mech-Tronics. In your letter you discussed three apparent violations at 1635 N. 25th Avenue.

The first item involved manifests for transportation of hazardous waste from our main plant to our temporary storage facility. In the past, we had not been able to manifest shipments due to confusion over the proper ILD numbers for our main plant and facility. This was cleared up recently with the issuance of a new ILD number for the main plant. At this time, there is a question regarding the proper authorization number to be used for the manifests. I have enclosed a copy of a letter written to Mike Nechvatal at the EPA requesting clarification on this matter. Once this is resolved, we can begin manifesting properly - we have all the other required permit numbers.

The second matter involved records relating to the training and job descriptions for individuals working with hazardous chemicals. Copies of these items are now on file in the Personnel Department.

The final matter involved the contingency plan. This plan has been substantially completed, and will be typed and on file by April 30, 1983.

If you have any questions regarding these items, please do not hesitate to contact me at (312) 344-9823, extension 68.

Sincerely,

Eugene Robert DeMuro
Administrative Assistant
